Subject: Backup Support-Tarasima Apparels Ltd

Dear Sir

We sold a DG set of 60KVA to Tarasima Apparels and they need that gen set on urgent basis. But unfortunately our stock has been finished due to a sudden order getting from other company and they took 2 units 60KVA immediate after confirmation. As a result that capacity is stock out now. Next container will be arrive end of April and up to that time we have to give them support though a Backup DG set (150kva) as they are our Valued client (we are working there with BBT and in future there are some more scope of BBT work). They will provide us one way transportation and at the time of delivering 60KVA DG set at their site, we will take back the support DG set. After getting clearance from our end client will send truck today evening to take that DG set.

So, please consider that issue to support TARASIMA Apparels with Backup DG set.
