Dear Sir,

We do appreciate your prompt approval regarding additional quantity and we are moving forward to complete the job.

From now onward, our team will set parameters and take all necessary approval during site survey before installation & delivery of the unit. We believe that we can recover this type of issue further.

Looking forward for your cooperation and mutual understanding.

Subject: RE: 1x100 KVA genset commissioning at SCL Uttara core

Dear Concerned,

It is our common practice to survey specific location of genset installation prior to the delivery of the product. So in future no confusion or issues can be raised regarding ducting route, silence outlet etc.

So it will be our expectation that we will be able to avoid these types of phenomenon (increasing of total price of BoQ by significant amount).

As for SCL Uttara Core please go forward with your shared revised additional qty. of silencer pipe and process further to complete the task at your earliest.

Looking forward to your co-operation.

Thanks with Regards,

Ashim Roy

Subject: RE: 1x100 KVA genset commissioning at SCL Uttara core

Dear Sir

Please be informed that, the previous BOQ was your defined location but now after negotiation with your concern person and house owner the Exhaust system position has been changed that's why work volume have been increased. As attached file for your better understanding.

Best regards,

Subject: RE: 1x100 KVA genset commissioning at SCL Uttara core

Dear Concerned,

According to your previous survey of this genset of silencer pipe was only 25 feet now due to the lacking's during previous survey it has been increased up to 60 feet. So significant cost of the ducting have also been increased.

you please share the justification behind this mismatch because this type of phenomenon can interrupt our regular working process.

Thanks with Regards,

Ashim Roy
